COLLEGE OF MICRONESIA-FSM

BOARD POLICY No. 3113

Title: Grade Point System

Date Adopted: 01 April 1993

Date Revised:

Date Reviewed: 24 May 2018

References:

A grade point system is used to compute a student's grade point average (GPA). The numerical value assigned to each grade is as follows:

A - 4.0

B - 3.0

C - 2.0

D - 1.0

F - 0.0

W – not computed

I-not computed

Grade point average is computed as follows:

- 1. Compute the grade points earned for each course by multiplying the course credits by the numerical value of the grade received in that course.
- 2. Compute the total grade points earned by adding the grade points earned for all courses attempted.
- 3. Divide the total grade points earned by the total number of credits attempted to obtain the grade point average.
- 4. Only courses taken at the College of Micronesia-FSM are used in computing the cumulative grade point average.
